# Probability and Statistics for Engineers and Scientists Course Syllabus: Fall 2018 

Lecture hours and location: 9:10-11:55, 13:50-16:25, Wednesday
Instructor: Dr. Shiquan Zhang
221, Zone 4 of Liberal Art Building
shiquanzhang@scu.edu.cn
Cell phone number: 18782054234
Office Hours: Wednesday 16:30-17:30
Text: Walpole, Myers, Myers and Ye, "Probability and Statistics for
Engineers and Scientists", Ninth Edition
Teaching Assistant: Zhuchu Wang

## Course Description:

This course is designed for students majoring in engineering. Topics include: data analysis, probability, random variables, discrete and continuous probability distributions, estimation and hypothesis testing, introduction to linear regression and analysis of variance.

## Objectives include:

- To provide an understanding of why good statistics are critical to effective decision making.
- To acquaint the students with the fundamental concepts of probability and statistics.
- To provide an understanding of the processes by which real-life statistical problems are analyzed.
- To develop an understanding of the role of statistics in engineering.
- To familiarize students with computer-based statistical analysis through available software packages.

## Applicable ABET Outcomes:

- An ability to apply knowledge of mathematics, science and engineering - An ability to design and conduct experiments, as well as to analyze and interpret data
- An ability to identify, formulate and solve engineering problems
- An ability to function on multi-disciplinary teams
- An ability to use the techniques, skills, and modern engineering tools necessary for engineering

Lectures: This course will be taught in the regular mode. The regular classroom approach will be discussed during the first lecture in detail. Homework: Homework problems will be assigned each week and are due in recitation the following week. Late homework is not accepted and homework not turned in will receive a score of 0 . All work (computer and manual) should be shown for each problem so that partial credit may be given.

Class Conduct: Please turn off your phones prior to the beginning of class. If you feel the need to text or check your email during class, kindly
leave the room.
Re-Grades: If you feel there has been an error in grading an assignment, you have one week from the day it was returned in class to submit it for a re-grade. When you resubmit the assignment, it must be accompanied by a written explanation of the potential grading mistake.

In Class Work /Class Exercises: There will be in class exercises assigned; if you are not in class you will be given a score of 0 . These exercises will count as extra quiz credit. It will be possible to have quiz average over $100 \%$.

Quizzes: Several random quizzes will be assigned in class. If you miss a quiz, you will be given a score of 0 .

Exams: There will be a final exam after the whole course. Everybody should take this exam except under extenuating circumstances.

Cheating of any form on quizzes or exams will result in a grade of $\mathbf{0}$ for that quiz or exam.

Grading: Continuous assessment: 40\%
Final exam: 60\%
Final letter grades will be assigned as follows:
A 93-100\%
$\mathrm{C}+77-79.9 \%$
D- $60-62.9 \%$
A- 90-92.9\% C 73-76.9\% F Below 60\%
B+87-89.9\% C-70-72.9\%
B 83-86.9\%
D+67-69.9\%

B- 80-82.9\% D 63-66.9\%

## TENTATIVE SCHEDULE

## Lecture Topics Homework

Week 1 Ch. 1 Introduction and Descriptive Statistics/Ch. 2 Random
Experiments, Sample Spaces and Events
Week 2 Ch. 2 Basic Conception and Computation rule of Probability
Week 3 Ch. 2 Conditional Probability, Total rule and Bayes rule
Week 4-5 Ch. 3 Random Variables and Probability Distributions
Week 6-7 Ch. 4 Mathematical Expectation
Week 8 Ch. 5 Some Discrete Probability Distributions
Week 9-10 Ch. 6 Some Continuous Probability Distributions
Week 11 Ch. 7 Functions of Random Variable
Week 12 Ch. 8 Sampling
Week 13-14 Ch. 9 One and Two Sample Estimation
Week 15-16 Ch. 10 One and Two Sample Tests of Hypothesis
Week 17 Final Exam
